Citing our Hoover’s In-Depth Company Record

MLA, APA, and Chicago/Turabian Style

Professional organizations like the Modern Language Association (MLA), the University of Chicago Press, and APA establish the documentation standards for most scholarly publishing in the U.S. Sample MLA, APA, and document types found in LexisNexis® databases. The example citations are shown as if all articles were found most cases, by removing the web URL part of the citation, the example turns into a citation for a print version. Dossier report, there is no print equivalent and you must cite the database itself as your source.

The rules for citing online documents are as changeable as the online publishing environment itself. Find out then select the relevant items from the bibliographic data section found at the top of each html file. Typically 1 you need in your citation.
